Manager of a Utah Company Talks of

Nevada Gold Region. John Freise, manager of the Goldfield-Scorpion company's properties, at Goldfield and Lida, Nev., came over from camp Tuesday night to remain several days. Mr. Freise's company is composed largely of Utah talent, F. J. Laven and J. M. Miller of Scofield being president and secretary, respectively, though C. Walters, a St. Louis operator, is one of the heaviest backers of the proposition. Mr. Freise went into the country last December to secure ground for the combination which has since incorporated, and he returns well pleased with the result of his labors and most enthusiastic over the future prospects, not only of his own company, but the country in general. "Between Goldfield and Lida, twenty-eight miles to the southwest," said Mr. Freise, "there is hardly an acre of ground that has not been staked off and held as mining claims. The ledges running through the country are remarkably strong, and many tremendously rich mines are going to result from the work which is now being everywhere inaugurated. In the Lida section the veins are capped with a heavy iron, carrying some comper hn Freise, manager of the Goldfield

of the numerous conjectures regarding it pointed to the measure announced this morning. This fact in itself aroused a doubt that a large part of the reports which have circulated regarding this stock were ill-informed. The effect on the common stock was unfavorable, as was not unnatural, in view of the prior privilege of the preferred stock, now to be doubled in amount to dividends to the extent of 4 per cent.

The common stock was offered heavily, both for domestic and toreign accounts. It was rigorously supported, however, all day. Brokers before the opening were making offers to take all the stock that anyone would sell, and the same brykers were diligent buyers up to the level of last night. The support was then relaxed again, but renewed at any periods of acute weakness. Officials of the company declined to add anything to the official circular as to the specific purposes for which the proceeds of the stocks are to be used or as to the proposed time for issuing it. Assertions were freely made, however, among the speculators in the stock that the project had to do with the proposed combination of Union Pacific with New York Central and Chicago & Northwestern. It was pointed out that President Harriman, in maintaining the wisdom of seeking financing capital requirements through the issue of stock rather than through the

nection with acquisition of stocks of other companies."

This was adduced to indicate that a merger project was in view, but Wall street had formed the opinion that the supposed merger was to be accomplished by the exchange of bonds of a holding company for existing securities, which would not involve a great outlay of cash. The prospect of a \$100,000,000 block of new stock, therefore, came as a shock to sentiment and emphasized the effect of the huge volume of issues which is being added to constantly from many sources. The determined support of Union Pacific Mexican dollars.
